

THE PRESIDENTS FORUM AGENDA

Date: **Wednesday, October 14th, 2020**
Time: 12:00 to 2:00 pm
Location: Zoom

CYBERSECURITY & FRAUD PREVENTION

In 2020, there has been a 53% increase in reported Ransomware incidents and significant increases in other payments related cyber-attacks, such as Business Email Compromise. In an effort to reduce our risk and stay ahead of the fraudsters, we have asked our speaker to join us to increase our awareness, share lessons he has learned in dealing with the bank's clients and educate us on Cyber Security and Fraud Prevention.

Just this week, one of the members called to ask for help because he had just had a Ransomware attack on his IT system. Unfortunately, this happened just prior to our speaker's presentation on this subject. This demonstrates how timely and relevant cyber security is for each of us.

This presentation will provide insights on how our threat landscape continues to evolve due to technology modernization, such as the Cloud. He will share the latest trends, and important actions you should consider to help safeguard your organization against cyber threats. Especially now with so many more of us working remotely.

Today, ransomware attacks have taken on a whole new approach. Not only do fraudsters take your data as hostage but release it publicly to ensure high payments. Don't be a victim, join our conversation.

Our speaker brings a wealth of experience to companies such as ours in dealing with cyber security threats. He has practical and pragmatic best practices that will prove useful to each of us.

BUSINESS CONDITIONS

We will compare our third quarter results for 2020 against what we are hearing from the media and government.

What has been the economic impact on your company during this Covid Pandemic?

We will discuss the challenges to not only our companies but also to our supply chain and customers.

Are there signs of a recession on your horizon?

FUTURE MEETING DATES

November 11th
